

## 9.1 Newsletter Term Three

Thank you so much for your hard work and support this term!

9.1 have been looking at climate change and in particular, animals which are endangered. We investigated lots of different endangered animals such as ocean tortoises, polar bears and orangutanes using the iPads, and were quite shocked as to how humans are causing these animals a threat of extinction. We looked at ways in which we can do our little bit in the environment to help.

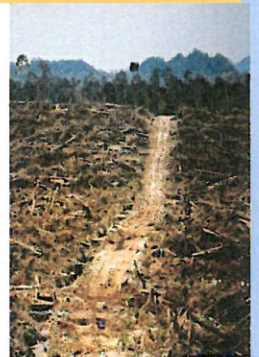

Shennise investigated orangutans and found out lots of interesting things such as where they live, what they eat and why they are at danger. We learnt that we are chopping down their habitat to obtain palm oil which is used in a lot of products that we use and don't even know. It's in things such as cosmetics, cooking oil, cleaning products, Nutella and shampoo.

This upset us! So we decided that we would like to do our bit to help.

Welcome to Knowle DGE's 9.1 very own orangutan: Jimmy Choo who we have adopted as a class.

We also had the idea of arranging some fundraising ideas to enable us to adopt more endangered animals to do our bit for the environment.

Thanks! From Miss Kruk, Mr Evans, and Leanne.

Well done on a great term, 9.1! We hope you have a wonderful half term holiday, and are ready and excited to learn next term.

Our theme for next term is "Our changing world."

In English, we will be working on non-fiction, with a focus on environmental issues.

In Maths, we will be looking at fractions and percentages.

In Science, we are continuing with our theme of diseases, health, and medicine.
