Another busy term in Key Stage 4!

In English we have been studying Macbeth; reading scripts together, identifying plots and characters, writing fake newspaper articles about the famous Scottish play and we even had a spot of dressing up as the cunning Witches! Shakespeare is always very challenging so well done to the class for trying their best.

In Maths we began the term with a Mock functional skills exam. We were over whelmed with the effort that the year 10's made in their first major mock. Following the exam we have been revising example questions from the test and revisiting areas for development.

## Science

The groups have slightly changed this term to better suit the needs of the students and generally the reports have shown improvement. Here is a picture of Ben making circuits during a physics lesson. This group also took part in a Mock exam and some students achieved Grades of C & D. Lots of hard work and dedication is needed to continue to stay on track for the GCSEs next year.

**100% Attendance this term is held by Dylan and Ben —Well done :)**

**Finally Thank you to all the year 10 boys who took part in the Basket Ball match; it was also great to see some supporters there to cheer them on. They have been working so hard in PE with team games which is great practice for their social skills.**

Uniform is so important—it makes the young people feel included and they all look so smart.
